Observability – Traefik Logs

Traefik Logs

- **What is logged –** Traefik logs everything concerning Traefik itself (start-up, configuration, events, shutdowns, service info, etc)

- **Where can I store the logs –** With the **filePath** configuration we determine the location of logs

- **Log Format**– Change the format of logs. Standard is **common** option is **json**

- **Log Level –** Determine the verbosity of logging using Level
  - DEBUG, PANIC, FATAL, ERROR, WARN, and INFO **(DEFAULT is ERROR)**
