Observability – Access Logs

Access Logs – Who calls Whom?

- **Configuration –** Configure the handling of the Access Logs

  - filePath

  - Format

  - bufferingSize

- **Filtering –** Log only certain status codes, retry attempts, or minDuration

- **Limiting the Fields/Include Header** – Manage what headers to keep, drop or redact

- **Log Rotation –** Rotate logs based on USR1 signal

- **Time Zone –** By default Traefik uses UTC, but this can be overriden
